

Skidders Pond Wind Energy Center

The Skidders Pond Wind Energy Center is a proposed 99-megawatt (MW) wind power generation facility in Prince Edward Island, Canada, targeted to begin operating in 2025. Wind energy is clean, renewable power from one of the oldest known energy sources, and today is one of the most affordable ways to modernize Canada's energy grid.

Project History

In late 2007, a large group of forward-thinking West Prince landowners began interviewing renewable energy companies for a wind project on their pooled lands. Many "garage meetings" were subsequently held, with proposals presented by various developers. When the landowners finally cast their ballots, Invenergy was selected to develop the Skidders Pond Wind Energy Centre. The Open House represents a key milestone in the substantial effort needed to prepare the project for construction, and ultimately the generation of locally produced clean, renewable power.

Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

Project Highlights

Over **\$2.5 million** projected annual investment through local taxes, landowner payments, and community benefit funds

99 MW is enough electricity to power more than **26,000 homes**

Up to **90 jobs** supported during construction

Up to **5 full-time** operations and maintenance staff

Emissions reductions equivalent to **76 million trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

The Ronceveaux Wind Energy Center, located in Québec, Canada, developed and built by Invenergy.

A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

With a high level of Canadian ownership and offices in both Toronto and Montreal, Invenergy invests \$400 million annually in the home communities where its projects are located.

Invenergy has successfully developed nearly 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
